Medical Result

****Weekly Exercise Schedule for John Doe****

****Frequency:**** 4 days a week

****Day 1: Walking****

- Duration: 30 minutes
- Intensity: Moderate pace
- Benefits: Improves cardiovascular health, boosts mood, and helps maintain a healthy weight.

****Day 2: Yoga****

- Duration: 45 minutes
- Type: Gentle yoga focusing on flexibility and relaxation
- Benefits: Reduces stress, improves flexibility, and enhances overall well-being.

****Day 3: Strength Training****

- Duration: 30 minutes
- Focus: Bodyweight exercises (e.g., squats, push-ups, lunges)
- Sets/Reps: 2 sets of 10-15 reps for each exercise
- Benefits: Builds muscle strength, supports metabolism, and improves bone density.

****Day 4: Walking****

- Duration: 30 minutes
- Intensity: Moderate pace
- Benefits: Similar to Day 1, reinforcing cardiovascular health and aiding recovery.

****Safety Notes:****

- Given the slightly low hemoglobin level, it is important to avoid high-intensity workouts that could lead to fatigue or weakness.
- Ensure proper hydration before, during, and after exercise.
- Listen to your body; if you feel fatigued or unwell, take a break or reduce the intensity of the workout.
- Consult with a healthcare provider before starting any new exercise program, especially considering the low hemoglobin level.

****Additional Recommendations:****

- Incorporate deep breathing exercises during yoga to enhance oxygen intake.
- Focus on a balanced diet rich in iron and vitamins to support hemoglobin levels.
- Gradually increase the intensity and duration of workouts as strength and endurance improve.
